

Weekly Citizen

ALBUQUERQUE, NEW MEXICO, 26, 1897

GOV. OTERO has done good work at Washington to New Mexico.

A bushel of American wheat is worth about \$2.34 in Mexican currency.

Tax is cheap—especially when you make use of your neighbor's telephone.

Of the 15,000 inhabitants of New York, only 50,000 are of American birth.

Taxes will be delinquent January 1, and now is the time to pay and save expenses.

DURING November, 26, 1896, Mexican cattle were imported into the United States.

ACCORDING to a list published in the Post, there is only one millionaire taxpayer in Denver.

PENNSYLVANIA spent last year \$20,000,000 on her public schools, and over 1,000,000 pupils were educated.

The question of water rights will be thoroughly tested in the courts when the new ditch is built in this country.

BRITISH CAPITAL is pouring into British Columbia. It is estimated that £2,000,000 will be taken here by capitalists.

LOS ANGELES is to have a new post office building, the senate having passed a bill appropriating \$25,000 for that purpose.

DURING the past year no passenger was lost on the great lakes. This is a remarkable showing of the safety of lake navigation.

HOWEVER hopelessly Congress may get tangled up on other questions, it is never any trouble for that body to pass a bill for mileage.

It goes to San Francisco do not stay overnight. During the past five years 200 deaths have occurred in sleeping rooms from foul gas.

GENERAL LEW WALLACE predicts that our next war will be with Japan and the occasion of it will be the possession of the Hawaiian Islands.

THE fact that there have been but thirty fatal terminations of prize flights since 1892 would go to show that the rules of the game need revising.

JUDGE EATON does not think that the United States supreme court will set aside the appeal of the Rio Grande dam and irrigation case until the adjourned session in February.

THE last survivor of Webster has just died in an Irish workshop, having arrived at the age of 90 years. He was 43 at the time of the battle in which he was severely wounded.

BRYAN is warmly received in Mexico, which is gratifying and not in the least a surprise. The scheme of free silver and free trade for us takes beautifully every where outside of the United States.

DRUGGIST KENNEDY's mining bill is being adversely criticised by nearly all the newspapers of the territory. It will need radical amendment to meet the approval of the people of the territory.

A SIGN who was about to be hanged remembered a poker debt and asked one of his friends to pay it. The Buffalo Express is of the opinion that such men are too scarce to be spared from this world.

THE armor plate board has made its report to Secretary Long, and, without suggesting any site, has recommended that the government establish an armor plate plant at a cost of about \$4,000,000.

AMONG the many sure signs of better times is the fact that the business failures in the United States were less in number and amount of liabilities in November, 1896, than during the same month for several years preceding.

THE populists carry out their announced intention to nominate a presidential ticket in 1896, they should not overlook the claims of Mr. Legrand Lawrence, of Lamar, Mo., who is said to have the longest whiskers ever worn by man.

THREE bills before the committee on public buildings and grounds for the erection of custom houses and postoffices in more than 200 cities of the United States and for the extension and enlargement of existing buildings in fifty other cities.

THE matter of the taxation of bicycles is receiving some attention in certain eastern states. It has been brought up in a number of states and cities from time to time, but the wheelmen have as a rule been able to secure the defeat of the proposition.

DEMOCRATIC contemporaries who criticise McKinley for declaring that he is following in the footsteps of Cleveland will probably be willing to make exceptions of private bond sales to favorite syndicates and the attempted compromise with defaulting railroad corporations.

THE trial of the cases of Josephine Danner, administrator, vs. Cerrillos Coal Railroad company, was commenced this afternoon before a jury. Messrs. R. Field and F. W. Chaney represent the plaintiff and R. E. Vitchell appears for the defense.

These cases grow out of the killing of the husband and two sons of the plain folk in the White Ash coal mine disaster, during the winter of 1895. They were tried at a previous term of the district court, but the jury was unable to agree upon a verdict, so the case was referred to the supreme court and reappealed to the last term of the judicial tribunal, and now comes up for new trial under the direction of the supreme court.

CALIFORNIA TRAFFIC PAYS.

SANTA FE LIMITED TRAINS PROVING MORE SUCCESSFUL THAN EVER.

The Santa Fe California limited trains have so far this season proved more successful financially than any year since their inauguration, and it has been fully admitted by the management to run the trains tri weekly instead of semi weekly.

The sorrowful news of the death of C. F. Conway on Tuesday morning cast a gloom over the city. He retired on Monday evening at about his usual hour and in the morning when the servant rang the breakfast bell nothing was heard from him, and his brother, T. F. Conway, becoming alarmed at his silence, went to his room to learn the cause, and found him dead in bed. Dr. Van Cleve was immediately sent for. The doctor informed a representative of the Eagle that he had died from heart disease, and when found one hand was clasped over the heart. The deceased was familiarly known as "C. F." and had been a resident of this section for a great many years. He was a Mason in good standing and the Eagle will perform the last solemn rites, and the funeral will be held at the Silver City Cage.

ST. JOSEPH'S, MO.:

The readers of this paper will be pleased to learn that there is at least one broad-based disease that science has not yet been able to cure—the toothache.

HALL'S CATARRH CURE is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease requires a constitutional treatment. Hall's catarrh cure is taken internally, acting directly upon the blood and mucus surfaces of the system, thus removing the cause of the disease and giving the patient strength by building up the constitution as a strong nature in doing its work.

The proprietors have so much faith in its curative powers that they offer one hundred dollars for any case that fails to receive a full refund of testimonials.

Address, F. J. CHENEY & CO., Toledo, Ohio.

MONEY OF MEXICO.

No account has come from Mexico, where William J. Bryan is now wandering in a special car, about a deficit of money supply in his own country.

This may be due to the fact that he has discovered that the increase of money in circulation in the United States since he was nomi-

nated for the presidency is double the entire amount of money existing in the republic of Mexico. The total money of that country, whose financial system Mr. Bryan urges us to adopt, is \$1,600,000,000, which \$67,000,000 is in silver coin, \$6,000,000 in gold and \$11,000,000 in uncovers paper, while the actual increase of the money in circulation in the United States since the beginning of the month in which Mr. Bryan was nominated is \$21,000,000.

A TENNESSEE editor, after carefully studying existing conditions in the south, concludes that there is marked room for improvement in many particulars. "We let our timber out," he says, "and buy fencing. We throw away our ashes and grease and buy soap, we raise dogs and buy hogs, we raise weeds and buy vegetables, we catch trout fish with \$1 rods, we build school houses and send our children off to be educated, and yet we send our boys out with a \$40 gun and a \$10 dog to hunt 10 cent birds."

IT is claimed by an eminent statistician that Russia, in twenty years from now will have 100,000 subjects, aside from the population that might result from the annexation of new territories. Her position among the powers at that time may be appreciated by comparison. Germany will have about 80,000,000, Great Britain about 80,000,000, and the United States, 100,000,000.

MADRID COAL MINES.

ONE of the First Camps in the United States, Near Cerrillos.

IMPROVEMENTS IN PROGRESS.

Madrid, N. M., Dec. 16.—Situated about four miles from Cerrillos is the coal mining camp of Madrid, owned and operated by the Cerrillos Coal railroad company. It has the reputation of being the finest, as well as one of the largest, mining camps in the United States. There are employed there at the present time 1,000 men and nearly all are men with families. The company has supplied its laborers with large two story dwelling houses. These houses are well ventilated with water works, are well supplied and from a hygienic standpoint, as well as in point of convenience, are up to the standard of costly dwellings in large cities. A number of water hydrants are placed around the camp and a supply of base, furnish excellent protection. The degree of the camp is to make the place as beautiful and attractive as possible and last spring 100 trees were set out, every one of which took root and flourished. Next spring a new supply of trees will be set out.

A TERRITORIAL editor, after carefully studying existing conditions in the south, concludes that there is marked room for improvement in many particulars.

"We let our timber out," he says, "and buy fencing. We throw away our ashes and grease and buy soap, we raise dogs and buy hogs, we raise weeds and buy vegetables, we catch trout fish with \$1 rods, we build school houses and send our children off to be educated, and yet we send our boys out with a \$40 gun and a \$10 dog to hunt 10 cent birds."
